

ENVIRONMENTAL COMPLIANCE CERTIFICATE
Amendment ECC-R12 1506-0053

I. SCOPE AND COVERAGE:

1. That this Certificate shall cover the expansion/increase of capacity of livestock farm (poultry and piggery) and Biogas Power Plant projects within the 145,663 hectares lot area and its related facilities located at Brgy. San Vicente, Banga, South Cotabato;
2. That the project shall have the following amended production capacities and facilities, to wit:

2.1 Poultry	-	1,800,000	birds
2.2 Piggery	-	10,000	sow level
2.3 Bio-Gas Power Plant	-	4,000.00	
Micro-Turbine Genset,	-	4,000	MW
2.4 Organic Fertilizer Production	-	35	tons/hour
2.5 Cartoon Egg Tray Production	-	80,000	per day
2.5 Wastewater Treatment Facility			

II. GENERAL CONDITIONS

ENVIRONMENTAL MANAGEMENT

The proponent shall strictly implement the following mitigating, enhancement, and rehabilitating measures:

3. That the Water Discharge Permit and Permit to Operate (P/O) Air Pollution Control Facilities (APCF) shall be secured from this Office prior to its operation and shall be renewed thirty (30) days before its expiration;
4. That the proponent shall comply with the provisions stipulated under the Clean Water Act (RA 9275), Clean Air Act (RA 8749), Solid Waste Management Act (RA 9003 and Toxic Substance and Hazardous and Nuclear Waste Control Act (RA 6969);

III. SPECIAL CONDITIONS

Further administrative conditions for the grant of this certificate shall be strictly complied:

5. That the chicken manure shall pass the screw press in which the liquid portion shall be charged to the Biogas Production System and dewatered solids must be processed in the fermentation chamber of the organic fertilizer production area;
6. That during the operation, conservation of ground water will be undertaken by recycling the treated wastewater to flush and to replenish the pits under the buildings;
7. That the unnamed creek cutting across the project site shall be stabilized and maintained so as not to cause flooding and soil erosion to Brgy. San Vicente Settlement area;
8. That proper sanitation in the area shall be implemented to prevent proliferation of flies;
9. That the proponent must undertake slope stabilization and protection control measures to minimize soil erosion during stripping and soil movement activities;
